

# Reconstruction of the Route 6 & Route 10 Interchange

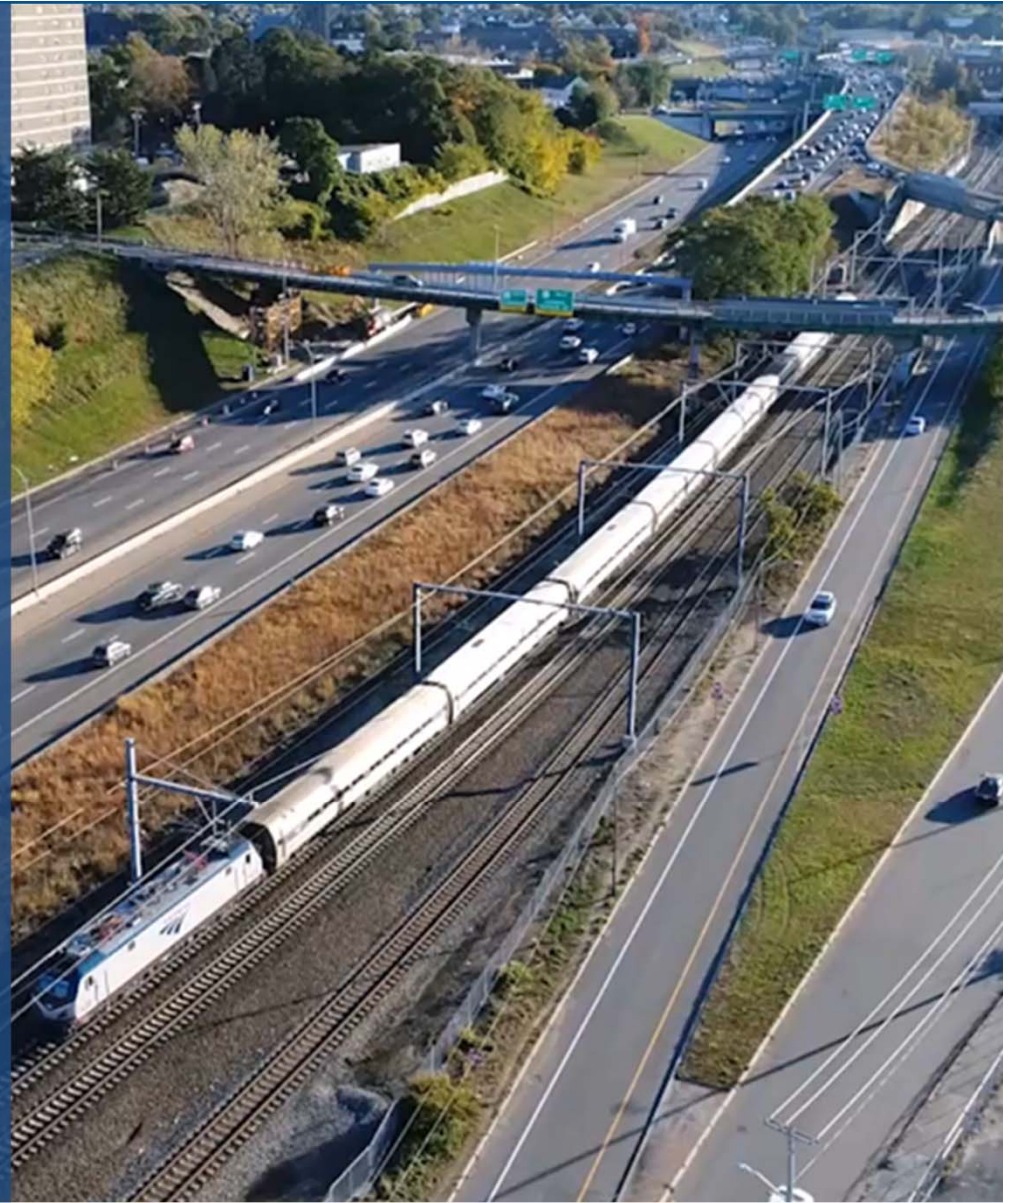

Public Information Meeting, Asa Messer Elementary School, June 19, 2018

# Agenda

- Introduction
- RIDEM
  - Soil Management
- Changes
- How to Stay Informed
- Questions

## *Design-Build - A Collaborative Effort*

## *Environmental Studies and Process*

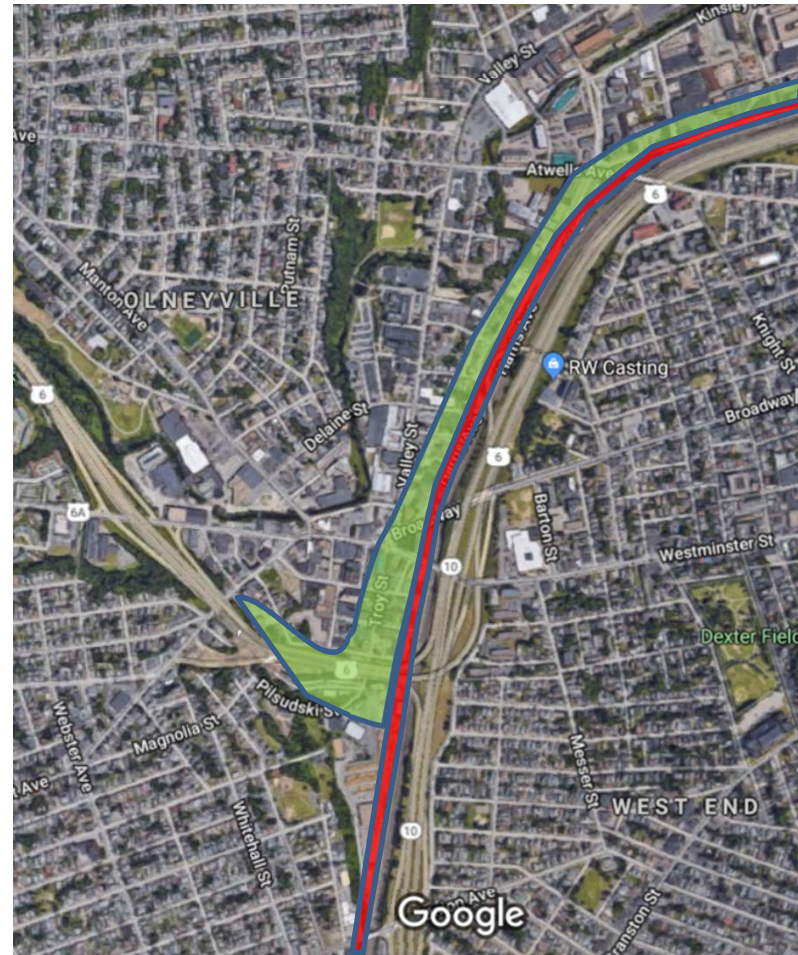

- The site investigation and remediation process is per the Rhode Island Department of Environmental Management (RIDEM) Office of Waste Management remediation regulations
- Studies and Documents Completed To Date:
  - Limited Subsurface Investigation Report – December 2017
  - Phase 1 Environmental Site Assessment – February 2018
  - Supplemental Soil Testing – March thru April 2018
  - Interim Soil and Material Management Plan Submitted– May 2018
  - Site investigation activities and public meeting – June 2018

# Findings

- Urban fill material affected by over a century of activities
- Soil affected by automobiles (motor oil, gasoline constituents)
- Soil affected by railroad and other facilities (coal constituents)
- Soil potentially affected by industrial development

# Environmental Management Of Soil

- Soil will be stockpiled following excavation
- Inactive stockpiles stabilized, until
  - Soil sent off-site for reuse or disposal, or
  - Soil reused beneath highways or clean soil cap
- Most soil will be sent off-site
- Cleaner soil will be reused
